MISCELLANEOUS PLAN OF THE CITY OF STOCKTON (EMPLOYER # 55)

Annual Valuation Report as of June 30, 2001

Dear Employer,

Enclosed please find a copy of the June 30, 2001, actuarial valuation of your pension plan (a separate report is included for each plan). This valuation report contains important actuarial information about your pension plan at CalPERS. CalPERS staff actuaries are available to discuss the actuarial report with you.

Included on page two of the report is the funded status of your plan as of June 30, 2001. The liability shown is the Entry Age Normal Accrued Liability, based on the method used to fund your plan. The calculation of this liability is based on the participants in your plan on June 30, 2001, the actuarial assumptions adopted by the CalPERS Board for your plan, the benefits for which you have contracted with CalPERS as of the date this valuation was performed, and other supplemental information as appropriate. The unfunded liability is equal to this liability less the assets of your plan on June 30, 2001. Please see the executive summary on pages two and three for more information. A three year historic trend of the funded status is provided in Appendix C for those agencies for which the last three annual valuations have been performed.

In August of 1998, CalPERS issued a comprehensive GASB 27 package that provided guidance with regard to the accounting standard. GASB 27 supplemental information packages are available by going to the CalPERS web site at www.calpers.ca.gov/employer/cirltrs/cirlst.htm, and then searching for "GASB". You should be aware that, each year, items in previous valuation reports will be needed in the preparation of the disclosures and accounting information required by GASB 27. This valuation report contains GASB 27 information in Appendix C, which can be used in your 2002/03 financial statements. However, the Annual Required Contribution (ARC) reported in Appendix C will not be used until your year 2003/04 financial statements.

Effect of Sluggish Economy and Lower Stock Prices on Future Contribution Rates

In June we sent out a circular letter concerning the impact of the sluggish economy and lower stock prices on employer contribution rates. We now know the impact on your fiscal year 2003/04 employer contribution rate and have ESTIMATED the impact on your fiscal 2004/05 employer contribution rate.

The exhibit below displays the required and projected employer contribution rates along with the Superfunded status for fiscal years 2003/04 and 2004/05, respectively. Note that these rates exclude any first or second Level 1959 Survivor costs that may be applicable. The rate for 2004/05 shown below is an estimate based on a projection of the most recent information we have available, including our latest best estimate of the investment return for fiscal 2001/02, namely -6.0%. Please disregard any projections that we may have provided to you in the past.

Telecommunications Device for the Deaf - (916) 326-3240
(916) 326-3420 FAX (916) 326-3005

Fiscal Year	Employer Contribution Rate	Superfunded?
2003/2004	3.689%	NO
2004/2005	11.9% (projected)	NO

Member contributions (whether paid by the employer or the employee) are in addition to the above rates.

The projection also assumes that there are no amendments and no liability gains or losses (such as larger than expected pay increases, more retirements than expected, etc.). This is a very significant assumption because these gains and losses do occur and can have a significant effect on your contribution rate. Even for the largest plans, such gains and losses often cause a change in the employer's contribution rate of one or two percent or larger in some less common instances. The contribution rates for smaller plans are much more sensitive to liability gains and losses. Unfortunately, these gains and losses cannot be predicted so the projected employer contribution rate is just an estimate.

We are very busy preparing actuarial valuations for other public agencies and expect to complete all such valuations by the end of October. We understand that you might have a number of questions about these results. While we are very interested in discussing these results with your agency, in the interest of allowing us to give every public agency their result, we ask that, if at all possible, you wait until after October 31 to contact us with questions. If you have questions, please call your assigned actuary, Bill Karch at (916) 341-2856.

Sincerely,

A handwritten signature in black ink, appearing to read "Ron Seeling".

Actuarial Certification

To the best of our knowledge, this report is complete and accurate and contains sufficient information to disclose, fully and fairly, the funded condition of the MISCELLANEOUS PLAN OF THE CITY OF STOCKTON. This valuation is based on the member and financial data as of June 30, 2001 provided by the various CalPERS databases and the benefits as of the date this report was produced provided under this contract with CalPERS. It is our opinion that the valuation has been performed in accordance with generally accepted actuarial principles, in accordance with standards of practice prescribed by the Actuarial Standards Board, and that the assumptions and methods are internally consistent and reasonable for this plan, as prescribed by the CalPERS Board of Administration according to provisions set forth in the California Public Employees' Retirement Law.

Chief Actuary, CalPERS

Executive Summary

Introduction

This report presents the results of the June 30, 2001 actuarial valuation of the MISCELLANEOUS PLAN OF THE CITY OF STOCKTON of the California Public Employees' Retirement System (CalPERS). The valuation was performed by CalPERS staff actuaries in order to:

- set forth the actuarial assets and funding liabilities of this plan as of June 30, 2001;
- certify the actuarially required employer contribution rate of this plan for the fiscal year July 1, 2003 through June 30, 2004;
- provide actuarial information as of June 30, 2001 to the CalPERS Board of Administration and other interested parties; and
- provide pension information as of June 30, 2001 to be used in financial reports subject to Governmental Accounting Standards Board Statement Number 27.

Use of this report for other purposes is inappropriate.

Assets & Liabilities

The actuarial valuation of the Plan as of June 30, 2001 indicates that the Plan's Entry Age Normal Accrued Liability is \$282,135,838. The corresponding Actuarial Value of Assets is equal to \$324,339,543 which is equivalent to 107.9% of the Market Value of Assets for the plan. For those plans that include 1st or 2nd Level 1959 Survivor Benefits, the liabilities and assets include the liabilities and assets for current beneficiaries of your 1959 Survivor Benefit program.

As of June 30, 2001, the Plan has an Unfunded Liability/(Excess Assets) of \$(42,203,705) and a funded status of 115.0%. For the prior year, the corresponding Unfunded Liability/(Excess Assets) was \$(56,603,708), and the funded status was 121.8%. The change in the Unfunded Liability/(Excess Assets) from the prior year reflects changes during the year ending June 30, 2001, including the impact of net actuarial gains and losses since the June 30, 2000 valuation. This includes recognition of a portion of the CalPERS' fiscal year 2000-2001 negative investment return on the Market Value of Assets that is first reflected in the plan's Actuarial Value of Assets at June 30, 2001, as shown on page 6 of the report.

Employer Contribution Rate

The actuarially required employer contribution rate, for the fiscal year July 1, 2003 through June 30, 2004 is equal to 3.689% of pay including the cost for the first and second levels of the 1959 Survivor Benefit Program, if applicable. The corresponding employer rate for fiscal year July 1, 2002 through June 30, 2003 was 0.000%. A breakdown of the rate for each fiscal year is shown below:

	Fiscal Year 2002-2003	Fiscal Year 2003-2004
Payment for Normal Cost	10.176%	10.346%
Payment on Amortization Bases	(10.176%)	(6.657%)
Payment for 1959 Survivor Benefit Program	0.000%	0.000%
Total (not less than zero)	0.000%	3.689%

The employer rate for fiscal 2003-2004 takes into consideration changes during the year ending June 30, 2001, including the net actuarial gains and losses since the June 30, 2000 valuation. This includes

recognition of a portion of the fiscal 2000-2001 market value investment loss which is recognized in the plan's Actuarial Value of Assets as of June 30, 2001. The balance of the investment loss not reflected in the 2003-2004 rate will have an adverse impact on the employer's rate in subsequent years due to (i) the asset smoothing method used by CalPERS, and (ii) CalPERS' approach to amortizing net unamortized actuarial gains/losses at 10% per year in determining the employer's rate. Refer to Appendix A for additional details.

Superfunded Status of the Plan

The total Present Value of Projected Benefits as of the June 30, 2001 annual actuarial valuation is \$359,076,060 compared to the Actuarial Value of Assets of \$324,339,543. Since the Actuarial Value of Assets does not exceed the Present Value of Projected Benefits as of the June 30, 2001 actuarial valuation, the plan is not Superfunded for the fiscal year ending June 30, 2004.

Changes Since Prior Valuation

Actuarial Assumptions – There were no changes in actuarial assumptions since the prior year's actuarial valuation, with the possible exception of changes necessary to reflect a change in benefits.

Methods – There were no changes in methods since the prior year's actuarial valuation. However, the CalPERS Board adopted Resolution 01-03-BD on June 20, 2001. Under this resolution, the employer had the option of increasing the Actuarial Value of Assets by an amount equal to two times the increase in the Present Value of Projected Benefits due to a contract amendment based upon the June 30, 2000 annual actuarial valuation and, if adopted, a Resolution of Intention to amend the contract is filed with CalPERS no later than June 30, 2002. The employer had the option to choose not to take an increase in the Actuarial Value of Assets in determining its rate and allow the regular asset smoothing method to operate as it normally would. Alternatively, the employer was permitted to limit the Actuarial Value of Assets to 100% of Market Value of Assets if normal application of the resolution would otherwise exceed this limit. Under no circumstances could the Actuarial Value of Assets in excess of 110% of the Market Value of Assets be utilized in determining the employer's rate. The standard asset smoothing methodology will then be used in subsequent years.

Details on methodology can be found in Appendix A.

Benefits –The standard actuarial practice at CalPERS is to recognize mandated legislative benefit changes in the first annual actuarial valuation following the effective date of those benefit changes. This practice is allowed under Federal rules that apply only to non-public retirement plans and is in common use in the private sector.

Liabilities in this report generally reflect plan changes effective before the performance of this valuation. Please refer to Appendix B for a summary of the plan provisions used in this valuation.

The effects of these changes and any other contract amendments since the prior valuation on the contribution rate are shown on page 8 of this report. However, it should be noted that no change in rate will be shown for any plan changes made after July 1, 2001, which were included in the 2000 actuarial valuation. In such case, the change was already included in the prior year's rate (and would have been shown as a change in the valuation report).

Summary of Current and Prior Year Results

Shown below are the comparisons of key valuation results for the current valuation date compared to corresponding values from the prior valuation date.

General Information	June 30, 2000	June 30, 2001
Members Included in the Valuation ¹		
Active Members	1,120	1,206
Transferred Members	435	446
Separated Members	230	260
Members and Beneficiaries Receiving Payments	<u>1,052</u>	<u>1,077</u>
Total	2,837	2,989
Annual Covered Payroll	\$ 46,733,690	\$ 50,843,185
Projected Annual Payroll for Contribution Year	\$ 52,190,852	\$ 56,780,219
Present Value of Future Salaries	\$ 422,437,296	\$ 458,078,327
Average Annual Covered Pay	\$ 41,727	\$ 42,159
Average Attained Age for Actives	45.15	44.97
Average Entry Age into Rate Plan for Actives	34.16	34.46
Average Attained Age for Transfers	49.28	48.82
Average Attained Age for Separations	44.94	45.40
Average Attained Age for Retirees and Beneficiaries	69.97	70.07
Average Annual Benefit for Retirees and Beneficiaries (excluding PPPA) \$	8,465	\$ 8,981

Funded Status	121.8%	115.0%
Required Contributions		
Employer Contribution Required (in Projected Dollars)		
Payment for Normal Cost	\$ 5,310,941	\$ 5,874,481
Payment on Amortization Bases ²	(5,310,941)	(3,779,613)
Payment for 1959 Survivor Benefit Program ³	<u>0</u>	<u>0</u>
Total (not less than zero)	\$ 0	\$ 2,094,868
Employer Contribution Required (Percent of Projected Payroll)		
Payment for Normal Cost	10.176%	10.346%
Payment on the Amortization Bases ²	(10.176%)	(6.657%)
Payment for 1959 Survivor Benefit Program ³	<u>0.000%</u>	<u>0.000%</u>
Total (not less than zero)	0.000%	3.689%

¹ Counts of members included in the valuation are counts of records processed by the valuation. Multiple records may exist for those who have service in more than one coverage group. This does not result in a double counting of liabilities. Counts do not include beneficiaries receiving a 1959 Survivor Benefit.

² Details regarding this payment can be found on Page 7 for the current valuation.

³ This is for first and second level only. The third, fourth and indexed levels are independent programs and are therefore billed separately.

**Development of Accrued and Unfunded Liabilities for the Retirement Program
 as of June 30, 2001**

1. Present Value of Projected Benefits	
a) Active Members	\$ 216,774,396
b) Transferred Members	16,071,144
c) Separated Members	6,104,640
d) Members and Beneficiaries Receiving Payments	<u>120,125,880</u>
e) Total	\$ 359,076,060
2. Present Value of Future Employer Normal Costs	\$ 44,874,760
3. Present Value of Future Employee Contributions	\$ 32,065,462
4. Entry Age Normal Accrued Liability	
a) Active Members [(1a) - (2) - (3)]	\$ 139,834,174
b) Transferred Members	16,071,144
c) Separated Members	6,104,640
d) Members and Beneficiaries Receiving Payments	<u>120,125,880</u>
e) Total	\$ 282,135,838
5. Actuarial Value of Assets	\$ 324,339,543
6. Unfunded Accrued Liability/(Excess Assets) [(4e) - (5)]	\$ (42,203,705)

Determination of Superfunded Status for the Fiscal Year Ending June 30, 2004

1. Present Value of Projected Benefits	\$ 359,076,060
2. Actuarial Value of Assets	\$ <u>324,339,543</u>
3. Is the plan Superfunded? * [Yes if (2) is greater than (1), No if (2) is less than or equal to (1)]	No

* See Appendix A for a definition of superfunded.

(Gain)/Loss Analysis 6/30/00 – 6/30/01 for the Retirement Program

To calculate the cost requirements of the plan, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year actual experience is compared to the expected experience based on the actuarial assumptions. This results in actuarial gains or losses, as shown below.

A. Total (Gain)/Loss for the Year

1. Unfunded Liability/(Excess Assets) as of 6/30/00	\$ (56,603,708)
2. Expected Payment on the Unfunded Liability during 2000-2001	(4,933,956)
3. Interest through 6/30/01 [.0825 x (A1) – ((1.0825) ^{1/2} - 1) x (A2) + adj.*]	<u>(4,470,314)</u>
4. Expected Unfunded Liability as of 6/30/01 before all other changes [(A1) - (A2) + (A3)]	\$ (56,140,066)
5. Change in Unfunded Liability as of 6/30/01 due to new plan amendments (including revaluation of assets where applicable)	\$ 0
6. Change in Unfunded Liability as of 6/30/01 due to changes in actuarial methods or assumptions	<u>0</u>
7. Expected Unfunded Liability as of 6/30/01 after all other changes [(A4) + (A5) + (A6)]	\$ (56,140,066)
8. Actual Unfunded Liability as of 6/30/01	<u>(42,203,705)</u>
9. Total (Gain)/Loss for 2000-2001 [(A8) – (A7)]	\$ 13,936,361

B. Contribution (Gain)/Loss for the Year

1. Expected Contribution for 2000-2001	\$ 3,394,034
2. Actual Contribution for 2000-2001	<u>3,506,945</u>
3. Contribution (Gain)/Loss for 2000-2001 [(B1) – (B2)]	\$ (112,911)

C. Asset (Gain)/Loss for the Year

1. Actuarial Value of Assets as of 6/30/00	\$ 316,600,619
2. Contributions Received during 2000-2001	3,506,945
3. Benefits and Refunds Paid during 2000-2001	(9,732,560)
4. Transfers and Miscellaneous Adjustments paid during fiscal 2000-2001	(38,609)
5. Exp. Int. for 2000-2001 [.0825 x (C1) + ((1.0825) ^{1/2} - 1) x ((C2) + (C3) + (C4))]	<u>25,866,272</u>
6. Expected Assets as of 6/30/01 [(C1) + (C2) + (C3) + (C4) + (C5)]	\$ 336,202,667
7. Actual Actuarial Value of Assets as of 6/30/01	<u>324,339,543</u>
8. Asset (Gain)/Loss for 2000-2001 [(C6)-(C7)]	\$ 11,863,124

D. Liability (Gain)/Loss for the Year

1. Total (Gain)/Loss for 2000-2001 (A9)	\$ 13,936,361
2. Contribution (Gain)/Loss for 2000-2001 (B3)	(112,911)
3. Asset (Gain)/Loss for 2000-2001 (C8)	<u>11,863,124</u>
4. Liability (Gain)/Loss for 2000-2001 [(D1) – (D2) – (D3)]	\$ 2,186,148

* An adjustment has been made in cases where there was an amendment during the year to reflect the partial year's payment for the amendment.

Schedule of Amortization Bases for the Retirement Program

The schedule below shows the development of the payment on the Amortization Bases shown on page 4. This payment represents the employer contribution toward the Unfunded Actuarial Liability. Each row of the schedule gives a brief description of a base (or portion of the Unfunded Actuarial Liability), the date the base was established, the original amount, and the number of years from June 30, 2003 to the final payment (Amortization Period). The balance of the base is then shown for the year immediately following the valuation date and the expected payment and projected base are shown for the next two fiscal years. The last year shown is the one for which rates are established in this report. The total expected payments for the fiscal years 2001-2002 and 2002-2003 are the fiscal year's expected payrolls multiplied by the difference between the fiscal year's total employer rate percentage and the June 30, 2001 employer normal cost percentage. The total payroll is expected to grow by 3.75% annually. Please see Appendix A for more detail, particularly for an explanation of how amortization periods are determined.

Reason for Base	Date Estab- lished	Initial Amount	Amorti- -zation Period	Balance 6/30/01	Expected Payment 2001-2002	Balance 6/30/02	Expected Payment 2002-2003	Amounts for Fiscal 2003-2004		
								Balance Beginning of Fiscal Year	Scheduled Payment for the Fiscal Year	Payment as Percentage of Payroll
(GAIN)/LOSS	06/30/01	\$13,936,361 ¹	N/A	\$13,936,361	\$0	\$15,086,111	\$0	\$16,330,715	\$1,699,101	2.992%
PAYMENT (GAIN)/LOSS	06/30/01	\$0 ²	N/A	\$0	\$(338,516)	\$352,203	\$(351,210)	\$746,670	\$77,686	0.137%
FRESH START	06/30/00	\$(56,603,708)	13	\$(56,140,066)	\$(5,118,979)	\$(55,445,669)	\$(5,310,941)	\$(54,494,261)	\$(5,556,400)	(9.786%)
TOTAL				\$(42,203,705)	\$(5,457,495)	\$(40,007,355)	\$(5,662,151)	\$(37,416,876)	\$(3,779,613)	(6.657%)

¹ The initial balance was the difference between the expected unfunded actuarial liability and the actual unfunded actuarial liability as of the date established. Subsequent balances were developed on page 6 of this and previous reports.

² Each expected payment is equal to the prior year's expected payment plus the difference between this year's total expected payment and prior year's corresponding total expected payment.

Reconciliation of Required Employer Contributions

Employer Contribution	Percentage of Projected Payroll	Estimated Dollars Based on Projected Annual Payroll
1. Contribution for 7/1/02 - 6/30/03 ¹	0.000%	\$ 0
2. Effect of changes since the prior valuation		
a) Effect of changes in 1959 Survivor Benefit program ²	0.000%	0
b) Effect of unexpected changes in demographics and financial results	3.689%	2,094,868
c) Effect of plan changes ³	0.000%	0
d) Effect of elimination of amortization base	0.000%	0
e) Effect of change in payroll	N/A	0
f) Effect of changes in actuarial methods or assumptions	<u>0.000%</u>	<u>0</u>
g) Net effect of the changes above [Sum of (a) through (f)]	3.689%	\$ 2,094,868
3. Contribution for 7/1/03 - 6/30/04 [(1)+(2g)]	3.689%	\$ 2,094,868

¹ The contribution actually paid may be different if a prepayment of unfunded actuarial liability is made or a plan change became effective after the prior year's actuarial valuation was performed.

² This is for first and second level only. The third, fourth and indexed levels are independent programs and are therefore billed separately. For agencies that changed from first or second level to third, fourth or indexed level, the display above will show a change to a zero rate for the 1959 Survivor Benefit program.

³ This includes the effect of the revaluation of the actuarial value of assets, if applicable.

Reconciliation of the Market Value of Assets over the Prior Fiscal Year

Retirement Program

1. Beginning Balance 6/30/00	\$ 330,744,687
2. Employer Contributions ¹	0
3. Employee Contributions ¹	3,506,945
4. Benefit Payments to Retirees and Beneficiaries	(9,612,511)
5. Refunds	(120,049)
6. Lump Sum Payments	0
7. Investment Return	(23,867,169)
8. Transfers In/Out and Miscellaneous Adjustments ²	<u>(38,609)</u>
9. Ending Balance 6/30/01 [(1)+(2)+(3)+(4)+(5)+(6)+(7)+(8)]	\$ 300,613,294

1959 Survivor Benefit Program (1st or 2nd Level)

1. Beginning Balance 6/30/00	\$ 0
2. Contributions (Employer and Employee) ¹	0
3. Benefit Payments	0
4. Transfers to the Third, Fourth or Indexed Level Pool and Miscellaneous Adjustments	0
5. Investment Return	<u>0</u>
6. Ending Balance 6/30/01 [(1)+(2)+(3)+(4)+(5)]	\$ 0

¹ In accordance with Generally Accepted Accounting Principles (GAAP), CalPERS' Fiscal Services Division's accounting records include accounts receivable to recognize income from transactions in the period in which those transactions occurs. When CalPERS receives payroll information, it determines the amount receivable for employer and employee contributions. Thus, contribution amounts may reflect contributions due, even if not paid.

² This includes such things as prepayments to the unfunded liability, receivable payments and transfers between plans.

Development of the Actuarial Value of Assets

Retirement Program

1. Actuarial Value of Assets as of June 30, 2000	\$	316,600,619
2. Contributions received during fiscal 2000-2001		3,506,945
3. Benefits and Refunds paid during fiscal 2000-2001		(9,732,560)
4. Transfers and Miscellaneous Adjustments paid during fiscal 2000-2001		(38,609)
5. Expected investment earnings during fiscal 2000-2001 [(1) x .0825 + (1.0825 ^{1/2} - 1) x ((2) + (3) + (4))]		25,866,272
6. Expected Actuarial Value of Assets as of June 30, 2001 [(1) + (2) + (3) + (4) + (5)]	\$	336,202,667
7. Market Value of Assets as of June 30, 2001	\$	300,613,294

Counts of members included in the valuation are counts of the records processed by the valuation system. Multiple records may exist for those who have service in more than one coverage group. This does not result in double counting of liabilities.

Appendix A

STATEMENT OF ACTUARIAL DATA, METHODS AND ASSUMPTIONS

DATA

As stated in the Actuarial Certification, the data which serves as the basis of this valuation has been obtained from the various CalPERS databases. We have reviewed the valuation data and believe that it is reasonable and appropriate in aggregate. We are unaware of any potential data issues that would have a material effect on the results of this valuation, except that data does not contain information about reciprocal systems. Therefore, salary information in these cases may not be accurate. This situation is relatively infrequent, however, and when it does occur, generally does not have a material impact on the employer contribution rates.

ACTUARIAL METHODS

Funding Method

The actuarial funding method used for the Retirement Program is the Entry Age Normal Cost Method. Under this method, projected benefits are determined for all members and the associated liabilities are spread in a manner that produces level annual cost as a percent of pay in each year from the age of hire (entry age) to the assumed retirement age. The cost allocated to the current fiscal year is called the normal cost.

The actuarial accrued liability for active members is then calculated as the portion of the total cost of the plan allocated to prior years. The actuarial accrued liability for members currently receiving benefits, for active members beyond the assumed retirement age, and for members entitled to deferred benefits, is equal to the present value of the benefits expected to be paid. No normal costs are applicable for these participants.

The excess of the total actuarial accrued liability over the actuarial value of plan assets is called the unfunded actuarial accrued liability. Funding requirements are determined by adding the normal cost and an amortization of the unfunded liability as a level percentage of assumed future payrolls. All changes in liability due to plan amendments, changes in actuarial assumptions, or changes in actuarial methodology are amortized separately over a 20-year period. In addition, all gains or losses are tracked and 10% of the net unamortized gain or loss will be amortized each year. Finally, if a plan's accrued liability exceeds the actuarial value of assets, the annual contribution with respect to the total unfunded liability may not be less than the amount produced by a 30-year amortization of the unfunded liability.

An exception to the funding rules above is used whenever the application of such rules results in inconsistencies. In these cases a "fresh start" approach is used. This simply means that the current unfunded actuarial liability is projected and amortized over a set number of years. As mentioned above, if the annual contribution on the total unfunded liability was less than the amount produced by a 30-year amortization of the unfunded liability, the plan actuary would implement a 30-year fresh start. In addition, a fresh start is needed in the following situations:

- 1) when a positive payment would be required on a negative unfunded actuarial liability (or conversely a negative payment on a positive unfunded actuarial liability); or
- 2) when the fresh start is being used to avoid a negative total rate.

It should be noted that the actuary may choose to use a fresh start under other circumstances. In all cases, the period of the fresh start is chosen by the actuary according to his or her best judgement, and will not be less than five years nor greater than 30 years.

The actuarial funding method for the 1st and 2nd Level 1959 Survivor Benefit is the modified Term Insurance Method. There is no actuarial accrued liability for active members; all liability is due to survivors of former active members. The normal cost is calculated as the amount needed to provide benefits to survivors of deaths expected in the next one-year period.

Asset Valuation Method

In order to dampen the effect of short term market value fluctuations on employer contribution rates, the following asset smoothing technique is used. First an Expected Value of Assets is computed by bringing forward the prior year's Actuarial Value of Assets and the contributions received and benefits paid during the year at the assumed actuarial rate of return. The Actuarial Value of Assets is then computed as the Expected Value of Assets plus one-third of the difference between the actual Market Value of Assets and the Expected Value of Assets as of the valuation date. However in no case will the Actuarial Value of Assets be less than 90% or greater than 110% of the actual Market Value of Assets.

There were no changes in methods since the prior year's actuarial valuation. However, the CalPERS Board adopted Resolution 01-03-BD on June 20, 2001. Under this resolution, the employer had the option of increasing the Actuarial Value of Assets by an amount equal to two times the increase in the Present Value of Projected Benefits due to a contract amendment based upon the June 30, 2000 annual actuarial valuation. The employer had the option to choose not to take an increase in the Actuarial Value of Assets in determining its rate and allow the regular asset smoothing method to operate as it normally would. Alternatively, the employer was permitted to limit the Actuarial Value of Assets to 100% of Market Value of Assets if normal application of the resolution would otherwise exceed this limit. Under no circumstances could the actuarial value of assets in excess of 110% of the Market Value of Assets be utilized in determining the employer's rate. The standard asset smoothing methodology will then be used in subsequent years.

MISCELLANEOUS

Superfunded Status

If the rate plan is superfunded (actuarial value of assets exceeds the present value of benefits), as of the most recently completed annual valuation, the employer may cover their employees' member contributions (both taxed and tax-deferred) using their employer assets during the fiscal year for which this valuation applies. This would entail transferring assets within the Public Employees' Retirement Fund (PERF) from the employer account to the member accumulated contribution accounts. This change was implemented effective January 1, 1999 pursuant to Chapter 231 (Assembly Bill 2099) which added Government Code Section 20816.

Internal Revenue Code Section 415

The limitations on benefits imposed by Internal Revenue Code Section 415 were not taken into account in this valuation. The effect of these limitations has been deemed immaterial on the overall results of this valuation.

ACTUARIAL ASSUMPTIONS

Economic Assumptions

Investment Return

8.25% compounded annually (net of expenses). This assumption is used for all plans.

Salary Growth

Annual increases that vary by category and duration of service. For Safety members, annual increases are also dependent on entry age. The assumed increases are shown below.

Duration of Service	Annual Percent Increase		
	Public Agency Miscellaneous	Public Agency Safety	
		Entry under Age 40	Entry 40 & Over
0 through 2	14.200%	11.587%	4.272%
3 through 6	6.363	7.408	4.272
7	6.363	5.161	4.272
8 through 29	4.795	5.161	4.272
30 +	3.750	5.161	4.272

Overall Payroll Growth

3.75% compounded annually (used in projecting the payroll over which the unfunded liability is amortized). This assumption is used for all plans.

Inflation

3.50% compounded annually. This assumption is used for all plans.

Miscellaneous Loading Factors

Credit for Unused Sick Leave

Final Average Salary is increased by 1% for those agencies that have accepted the provision providing Credit for Unused Sick Leave.

Conversion of Employer Paid Member Contributions (EPMC)

Final Average Salary is increased by the Employee Contribution Rate for those agencies that have contracted for the provision providing for the Conversion of Employer Paid Member Contributions (EPMC) during the final compensation period.

Norris Decision (Best Factors)

Employees hired prior to July 1, 1982 have projected benefit amounts increased in order to reflect the use of "Best Factors" for these employees in the calculation of optional benefit forms. This is due to a 1983 Supreme Court decision, known as the Norris decision, which required males and females to be treated equally in the determination of benefit amounts. Consequently, anyone already employed at that time is given the best possible conversion factor when optional benefits are determined. No loading is necessary for employees hired after July 1, 1982.

Demographic Assumptions

Postretirement Mortality

Rates vary by age and sex for healthy benefit recipients and for non-industrially disabled (disability not job-related) retirees. Rates vary by age for retirees who are industrially disabled (disability is job-related). See sample rates in table below. These rates are used for all plans.

<u>Age</u>	<u>Healthy Recipients</u>		<u>Non-Industrially Disabled (Not Job-Related)</u>		<u>Industrially Disabled (Job-Related)</u>
	<u>Male</u>	<u>Female</u>	<u>Male</u>	<u>Female</u>	<u>Male & Female</u>
50	0.0052	0.0021	0.0301	0.0177	0.0054
55	0.0073	0.0034	0.0327	0.0189	0.0089

100	0.3212	0.2930	0.4659	0.4575	0.3950

Marital Status

For active members, a percentage married upon retirement is assumed according to the following table.

<u>Member Category</u>	<u>Percent Married</u>
Miscellaneous Member	85%
Local Police	90%
Local Fire	90%
Other Local Safety	90%
School Police	90%

Age of Spouse

It is assumed that female spouses are 3 years younger than male spouses. This assumption is used for all plans.

Public Agency Miscellaneous 2% @ 60

Service Retirement

Rates vary by age and sex. See table below.

Industrial (Job-Related) Disability

Rates vary by age and sex. Rates are zero unless the agency has specifically contracted for Industrial Disability benefits. If so, each Non-Industrial Disability rate shown above will be split into two components: 50% will become the Non-Industrial Disability rate and 50% will become the Industrial Disability rate.

Industrial (Job-Related) Death

Rates vary by age and sex. Rates are zero unless the agency has specifically contracted for Industrial Death benefits. If so, each Non-Industrial Death rate shown above will be split into two components: 99% will become the Non-Industrial Death rate and 1% will become the Industrial Death rate.

Public Agency Miscellaneous 2% @ 55, 2.5% @ 55, 2.7% @ 55, 3% @ 60

Service Retirement

Rates vary by age and sex. See table below.

* These rates also apply to School Police. The only differences are the Industrial Disability and Industrial Death rates. The School Police use 50% of the rates displayed above.

Public Agency Police ½ @ 55 and 2% @ 55*

Service Retirement

Rates vary by age. See table below.

<u>Age</u>	<u>Rate</u>	<u>Age</u>	<u>Rate</u>
50	0.02552	56	0.06921
51	0.00000	57	0.05113
52	0.01637	58	0.07241
53	0.02717	59	0.07043
54	0.00949	60	1.00000
55	0.16674		

The rate is set to 100% for any year in which the combination of age and service results in a benefit that would be limited to 90% of final compensation.

Termination with Refund

Rates vary by entry age and service. See sample rates in table below.

<u>Entry Age</u>	<u>Termination with Refund</u>					
	<u>Years of Service</u>					
	0-1	1-2	2-3	3-4	4-5	5 or more
20	0.05709	0.05768	0.05828	0.05888	0.05949	0.03497
25	0.06011	0.06073	0.06135	0.06199	0.06263	0.02683
30	0.06328	0.06393	0.06459	0.06526	0.06593	0.02058
35	0.06662	0.06730	0.06800	0.06870	0.06941	0.01578
40	0.07013	0.07085	0.07159	0.07233	0.07307	0.01211

Appendix B

SUMMARY OF PRINCIPAL PLAN PROVISIONS

SUMMARY OF BENEFITS: COVERAGE GROUP 70001

The following is a summary of the major plan provisions used in calculating the liabilities of the plan. Many of the statements in this summary are general in nature, and are intended to provide an easily understood summary of the complex Public Employees' Retirement Law. The law itself governs in all situations.

RETIREMENT PROGRAM

Service Retirement

Eligibility

A CalPERS member becomes eligible for Service Retirement upon attainment of age 50 with at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements)

Benefit

The Service Retirement benefit calculated for service earned by this group of employees is a monthly allowance equal to the product of the *benefit factor*, *years of service*, and *final compensation*, where

- The *benefit factor* for this group of employees comes from the **2% at 55 Miscellaneous** benefit factor table. The factor depends on the member's age at retirement. Listed below are the factors for retirement at whole year ages:

<u>Retirement Age</u>	<u>2% at 55 Miscellaneous Factor</u>
50	1.426%
51	1.522%
52	1.628%
53	1.742%
54	1.866%
55	2.000%
56	2.052%
57	2.104%
58	2.156%
59	2.210%
60	2.262%
61	2.314%
62	2.366%
63 & Up	2.418%

- The *years of service* is the amount credited by CalPERS to a member while he or she is employed in this group (or for other periods that are recognized under the employer's contract with CalPERS). For a member who has earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance. Any unused sick leave accumulated at the time of retirement will be converted to credited service at the rate of 0.004 years of service for each day of sick leave.
- The *final compensation* is the monthly average of the member's highest 12 consecutive months' full-time equivalent monthly pay (no matter which CalPERS employer paid this

compensation). The employees in this group are not covered by Social Security. The final compensation is not offset by a dollar amount.

- The Service Retirement benefit is not capped.

Vested Deferred Retirement

Eligibility for Deferred Status

A CalPERS member becomes eligible for a deferred vested retirement benefit when he or she leaves employment, keeps his or her contribution account balance on deposit with CalPERS, **and** has earned at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements).

Eligibility to Start Receiving Benefits

The CalPERS member becomes eligible to receive the deferred retirement benefit upon satisfying the eligibility requirements for Deferred Status and upon attainment of age 50.

Benefit

The vested deferred retirement benefit is the same as the Service Retirement benefit, where the benefit factor is based on the member's age at allowance commencement. For members who have earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance.

Non-Industrial (Non-Job Related) Disability Retirement

Eligibility

A CalPERS member is eligible for Non-Industrial Disability Retirement if he or she becomes *disabled* and has at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements). There is no special age requirement. *Disabled* means the member is unable to perform his or her job because of an illness or injury which is expected to be permanent or to last indefinitely. The illness or injury does not have to be job related. A CalPERS member must be actively working with any CalPERS employer at the time of disability in order to be eligible for this benefit.

Benefit

The Non-Industrial Disability Retirement benefit is a monthly allowance equal to 1.8% of final compensation, multiplied by *service*, which is determined as follows:

- *service* is CalPERS credited service, for members with less than 10 years of service or greater than 18.518 years of service; or
- *service* is CalPERS credited service plus the additional number of years that the member would have worked until age 60, for members with at least 10 years but not more than 18.518 years of service. The maximum benefit in this case is 33 1/3% of Final Compensation.

Members who are eligible for a larger service retirement benefit may choose to receive that benefit in lieu of a disability benefit. Members eligible to retire, and who have attained the normal retirement age determined by their service retirement benefit formula, will receive the same dollar amount for disability retirement as that payable for service retirement. For members who have earned service with multiple CalPERS employers, the benefit attributed to each employer is the total disability allowance multiplied by the ratio of service with a particular employer to the total CalPERS service.

Post-Retirement Death Benefit

Lump Sum Payment

Upon the death of a retiree, a one-time lump sum payment of \$500 will be made to the retiree's designated survivor(s), or to the retiree's estate.

Form of Payment for Retirement Allowance

Generally, the retirement allowance is paid to the retiree in the form of an annuity for as long as he or she is alive. The retiree may choose to provide for a portion of his or her allowance to be paid to any designated beneficiary after the retiree's death. CalPERS provides for a variety of such benefit options, which the retiree pays for by taking a reduction in his or her retirement allowance. The larger the amount to be provided to the beneficiary is, and the younger the beneficiary is, the greater the reduction to the retiree's allowance.

For retirement allowances with respect to service earned by employment in this group, 50% of the retirement allowance will automatically be continued to certain statutory beneficiaries upon the death of the retiree, *without* a reduction in the retiree's allowance. This additional benefit is often referred to as *post retirement survivor allowance* (PRSA) or simply as *survivor continuance*.

In other words, 50% of the allowance, the *continuance portion*, is paid to the retiree for as long as he or she is alive, and that same amount is continued to the retiree's spouse (or if no eligible spouse, to unmarried children until they attain age 18; or, if no eligible children, to a qualifying dependent parent) for the rest of his or her lifetime.

The remaining portion of the retirement allowance, which may be referred to as the *option portion* of the benefit, is paid to the retiree as an annuity for as long as he or she is alive. Or, the retiree may choose to provide for some of this *option portion* to be paid to **any** designated beneficiary after the retiree's death. CalPERS offers a variety of such benefit options, which the retiree pays for by taking a reduction to the option portion of his or her retirement allowance.

Pre-Retirement Death Benefits

Basic Death Benefit

Eligibility

An employee's beneficiary (or estate) may receive the Basic Death benefit if the member dies while actively employed. A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. A member's survivor who is eligible for any other pre-retirement death benefit described below may choose to receive that death benefit instead of this Basic Death benefit.

Benefit

The Basic Death Benefit is a lump sum in the amount of the member's accumulated contributions, where interest is currently credited at 8.25% per year, plus a lump sum in the amount of one month's salary for each completed year of current service, up to a maximum of six months' salary. For purposes of this benefit, one month's salary is defined as the member's average monthly full-time rate of compensation during the 12 months preceding death.

1957 Survivor Benefit

Eligibility

An employee's *eligible survivor(s)* may receive the 1957 Survivor benefit if the member dies while actively employed, has attained at least age 50, and has at least 5 years of credited service (total service across all CalPERS employers and with certain other Retirement Systems with which CalPERS has reciprocity agreements). A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. An eligible survivor means the surviving spouse to whom the member was married at least one year before death or, if there is no eligible spouse, to the member's unmarried children under age 18. A member's survivor may choose this benefit in lieu of the Basic Death benefit or the Special Death benefit.

Benefit

The 1957 Survivor benefit is a monthly allowance equal to one-half of the unmodified Service Retirement benefit that the member would have been entitled to receive if the member had retired on the date of his or her death. If the benefit is payable to the spouse, the benefit is discontinued upon the death of the spouse. If the benefit is payable to a dependent child, the benefit will be discontinued upon death or attainment of age 18, unless the child is disabled. There is a guarantee that the total amount paid will at least equal the Basic Death benefit.

Cost-of-Living Adjustments

Beginning the second calendar year after the year of retirement, retirement and survivor allowances will be annually adjusted on a compound basis by 5%. However, the cumulative adjustment may not be greater than the cumulative change in the Consumer Price Index since the date of retirement.

Purchasing Power Protection Allowance (PPPA)

Retirement and survivor allowances are protected against inflation by PPPA. PPPA benefits are cost-of-living adjustments that are intended to maintain an individual's allowance at 80% of the initial allowance at retirement adjusted for inflation since retirement. The PPPA benefit will be coordinated with other cost-of-living adjustments provided under the plan.

Employee Contributions

Each employee contributes toward his or her retirement based upon the following schedule. The employer may choose to "pick-up" these contributions for the employees.

The percent contributed below the monthly compensation breakpoint is 0%.

The monthly compensation breakpoint is \$0.

The percent contributed above the monthly compensation breakpoint is 7%.

Employer Paid Member Contributions (EPMC)

Through the collective bargaining process, the employer, who has agreed to pay the employee contributions for this group, will stop paying these contributions during the final compensation period and instead increase the pay of the members by 7%. This will result in a higher average monthly pay for the purpose of computing the member's retirement allowance.

Refund of Employee Contributions

If the member's service with the employer ends, and if the member does not satisfy the eligibility conditions for any of the retirement benefits above, the member may elect to receive a refund of his or her employee contributions, which are credited annually with 6% interest.

1959 Survivor Benefit Fourth Level

This benefit is not included in the results presented earlier in this valuation. Please see Appendix D for more information.

SUMMARY OF BENEFITS: COVERAGE GROUP 70002

The following is a summary of the major plan provisions used in calculating the liabilities of the plan. Many of the statements in this summary are general in nature, and are intended to provide an easily understood summary of the complex Public Employees' Retirement Law. The law itself governs in all situations.

RETIREMENT PROGRAM

Service Retirement

Eligibility

A CalPERS member becomes eligible for Service Retirement upon attainment of age 50 with at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements)

Benefit

The Service Retirement benefit calculated for service earned by this group of employees is a monthly allowance equal to the product of the *benefit factor*, *years of service*, and *final compensation*, where

- The *benefit factor* for this group of employees comes from the **2% at 55 Miscellaneous** benefit factor table. The factor depends on the member's age at retirement. Listed below are the factors for retirement at whole year ages:

<u>Retirement Age</u>	<u>2% at 55 Miscellaneous Factor</u>
50	1.426%
51	1.522%
52	1.628%
53	1.742%
54	1.866%
55	2.000%
56	2.052%
57	2.104%
58	2.156%
59	2.210%
60	2.262%
61	2.314%
62	2.366%
63 & Up	2.418%

- The *years of service* is the amount credited by CalPERS to a member while he or she is employed in this group (or for other periods that are recognized under the employer's contract with CalPERS). For a member who has earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance. Any unused sick leave accumulated at the time of retirement will be converted to credited service at the rate of 0.004 years of service for each day of sick leave.
- The *final compensation* is the monthly average of the member's highest 12 consecutive months' full-time equivalent monthly pay (no matter which CalPERS employer paid this

compensation). The employees in this group are covered by Social Security. The benefit is referred to as being "modified" because the final compensation is offset by \$133.33 (or by one third if the final compensation is less than \$400).

- The Service Retirement benefit is not capped.

Vested Deferred Retirement

Eligibility for Deferred Status

A CalPERS member becomes eligible for a deferred vested retirement benefit when he or she leaves employment, keeps his or her contribution account balance on deposit with CalPERS, **and** has earned at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements).

Eligibility to Start Receiving Benefits

The CalPERS member becomes eligible to receive the deferred retirement benefit upon satisfying the eligibility requirements for Deferred Status and upon attainment of age 50.

Benefit

The vested deferred retirement benefit is the same as the Service Retirement benefit, where the benefit factor is based on the member's age at allowance commencement. For members who have earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance.

Non-Industrial (Non-Job Related) Disability Retirement

Eligibility

A CalPERS member is eligible for Non-Industrial Disability Retirement if he or she becomes *disabled* and has at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements). There is no special age requirement. *Disabled* means the member is unable to perform his or her job because of an illness or injury which is expected to be permanent or to last indefinitely. The illness or injury does not have to be job related. A CalPERS member must be actively working with any CalPERS employer at the time of disability in order to be eligible for this benefit.

Benefit

The Non-Industrial Disability Retirement benefit is a monthly allowance equal to 1.8% of final compensation, multiplied by *service*, which is determined as follows:

- *service* is CalPERS credited service, for members with less than 10 years of service or greater than 18.518 years of service; or
- *service* is CalPERS credited service plus the additional number of years that the member would have worked until age 60, for members with at least 10 years but not more than 18.518 years of service. The maximum benefit in this case is 33 1/3% of Final Compensation.

Members who are eligible for a larger service retirement benefit may choose to receive that benefit in lieu of a disability benefit. Members eligible to retire, and who have attained the normal retirement age determined by their service retirement benefit formula, will receive the same dollar amount for disability retirement as that payable for service retirement. For members who have earned service with multiple CalPERS employers, the benefit attributed to each employer is the total disability allowance multiplied by the ratio of service with a particular employer to the total CalPERS service.

Post-Retirement Death Benefit

Lump Sum Payment

Upon the death of a retiree, a one-time lump sum payment of \$500 will be made to the retiree's designated survivor(s), or to the retiree's estate.

Form of Payment for Retirement Allowance

Generally, the retirement allowance is paid to the retiree in the form of an annuity for as long as he or she is alive. The retiree may choose to provide for a portion of his or her allowance to be paid to any designated beneficiary after the retiree's death. CalPERS provides for a variety of such benefit options, which the retiree pays for by taking a reduction in his or her retirement allowance. The larger the amount to be provided to the beneficiary is, and the younger the beneficiary is, the greater the reduction to the retiree's allowance.

For retirement allowances with respect to service earned by employment in this group, 25% of the retirement allowance will automatically be continued to certain statutory beneficiaries upon the death of the retiree, *without* a reduction in the retiree's allowance. This additional benefit is often referred to as *post retirement survivor allowance* (PRSA) or simply as *survivor continuance*.

In other words, 75% of the allowance, the *continuance portion*, is paid to the retiree for as long as he or she is alive, and that same amount is continued to the retiree's spouse (or if no eligible spouse, to unmarried children until they attain age 18; or, if no eligible children, to a qualifying dependent parent) for the rest of his or her lifetime.

The remaining portion of the retirement allowance, which may be referred to as the *option portion* of the benefit, is paid to the retiree as an annuity for as long as he or she is alive. Or, the retiree may choose to provide for some of this *option portion* to be paid to **any** designated beneficiary after the retiree's death. CalPERS offers a variety of such benefit options, which the retiree pays for by taking a reduction to the option portion of his or her retirement allowance.

Pre-Retirement Death Benefits

Basic Death Benefit

Eligibility

An employee's beneficiary (or estate) may receive the Basic Death benefit if the member dies while actively employed. A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. A member's survivor who is eligible for any other pre-retirement death benefit described below may choose to receive that death benefit instead of this Basic Death benefit.

Benefit

The Basic Death Benefit is a lump sum in the amount of the member's accumulated contributions, where interest is currently credited at 8.25% per year, plus a lump sum in the amount of one month's salary for each completed year of current service, up to a maximum of six months' salary. For purposes of this benefit, one month's salary is defined as the member's average monthly full-time rate of compensation during the 12 months preceding death.

1957 Survivor Benefit

Eligibility

An employee's *eligible survivor(s)* may receive the 1957 Survivor benefit if the member dies while actively employed, has attained at least age 50, and has at least 5 years of credited service (total service across all CalPERS employers and with certain other Retirement Systems with which CalPERS has reciprocity agreements). A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. An eligible survivor means the surviving spouse to whom the member was married at least one year before death or, if there is no eligible spouse, to the member's unmarried children under age 18. A member's survivor may choose this benefit in lieu of the Basic Death benefit or the Special Death benefit.

Benefit

The 1957 Survivor benefit is a monthly allowance equal to one-half of the unmodified Service Retirement benefit that the member would have been entitled to receive if the member had retired on the date of his or her death. If the benefit is payable to the spouse, the benefit is discontinued upon the death of the spouse. If the benefit is payable to a dependent child, the benefit will be discontinued upon death or attainment of age 18, unless the child is disabled. There is a guarantee that the total amount paid will at least equal the Basic Death benefit.

Cost-of-Living Adjustments

Beginning the second calendar year after the year of retirement, retirement and survivor allowances will be annually adjusted on a compound basis by 5%. However, the cumulative adjustment may not be greater than the cumulative change in the Consumer Price Index since the date of retirement.

Purchasing Power Protection Allowance (PPPA)

Retirement and survivor allowances are protected against inflation by PPPA. PPPA benefits are cost-of-living adjustments that are intended to maintain an individual's allowance at 80% of the initial allowance at retirement adjusted for inflation since retirement. The PPPA benefit will be coordinated with other cost-of-living adjustments provided under the plan.

Employee Contributions

Each employee contributes toward his or her retirement based upon the following schedule. The employer may choose to "pick-up" these contributions for the employees.

The percent contributed below the monthly compensation breakpoint is 0%.

The monthly compensation breakpoint is \$133.33.

The percent contributed above the monthly compensation breakpoint is 7%.

Employer Paid Member Contributions (EPMC)

Through the collective bargaining process, the employer, who has agreed to pay the employee contributions for this group, will stop paying these contributions during the final compensation period

and instead increase the pay of the members by 7%. This will result in a higher average monthly pay for the purpose of computing the member's retirement allowance.

Refund of Employee Contributions

If the member's service with the employer ends, and if the member does not satisfy the eligibility conditions for any of the retirement benefits above, the member may elect to receive a refund of his or her employee contributions, which are credited annually with 6% interest.

SUMMARY OF BENEFITS: COVERAGE GROUP 70401

The following is a summary of the major plan provisions used in calculating the liabilities of the plan. Many of the statements in this summary are general in nature, and are intended to provide an easily understood summary of the complex Public Employees' Retirement Law. The law itself governs in all situations.

RETIREMENT PROGRAM

Service Retirement

Eligibility

A CalPERS member becomes eligible for Service Retirement upon attainment of age 50 with at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements)

Benefit

The Service Retirement benefit calculated for service earned by this group of employees is a monthly allowance equal to the product of the *benefit factor*, *years of service*, and *final compensation*, where

- The *benefit factor* for this group of employees comes from the **2% at 60** benefit factor table. The factor depends on the member's age at retirement. Listed below are the factors for retirement at whole year ages:

<u>Retirement Age</u>	<u>2% at 60 Factor</u>
50	1.092%
51	1.156%
52	1.224%
53	1.296%
54	1.376%
55	1.460%
56	1.552%
57	1.650%
58	1.758%
59	1.874%
60	2.000%
61	2.134%
62	2.272%
63 & Up	2.418%

- The *years of service* is the amount credited by CalPERS to a member while he or she is employed in this group (or for other periods that are recognized under the employer's contract with CalPERS). For a member who has earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance. Any unused sick leave accumulated at the time of retirement will be converted to credited service at the rate of 0.004 years of service for each day of sick leave.
- The *final compensation* is the monthly average of the member's highest 36 consecutive months' full-time equivalent monthly pay (no matter which CalPERS employer paid this

compensation). The employees in this group are covered by Social Security. The benefit is referred to as being "modified" because the final compensation is offset by \$133.33 (or by one third if the final compensation is less than \$400).

- The Service Retirement benefit is not capped.

Vested Deferred Retirement

Eligibility for Deferred Status

A CalPERS member becomes eligible for a deferred vested retirement benefit when he or she leaves employment, keeps his or her contribution account balance on deposit with CalPERS, **and** has earned at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements).

Eligibility to Start Receiving Benefits

The CalPERS member becomes eligible to receive the deferred retirement benefit upon satisfying the eligibility requirements for Deferred Status and upon attainment of age 50.

Benefit

The vested deferred retirement benefit is the same as the Service Retirement benefit, where the benefit factor is based on the member's age at allowance commencement. For members who have earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance.

Non-Industrial (Non-Job Related) Disability Retirement

Eligibility

A CalPERS member is eligible for Non-Industrial Disability Retirement if he or she becomes *disabled* and has at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements). There is no special age requirement. *Disabled* means the member is unable to perform his or her job because of an illness or injury which is expected to be permanent or to last indefinitely. The illness or injury does not have to be job related. A CalPERS member must be actively working with any CalPERS employer at the time of disability in order to be eligible for this benefit.

Benefit

The Non-Industrial Disability Retirement benefit is a monthly allowance equal to 1.8% of final compensation, multiplied by *service*, which is determined as follows:

- *service* is CalPERS credited service, for members with less than 10 years of service or greater than 18.518 years of service; or
- *service* is CalPERS credited service plus the additional number of years that the member would have worked until age 60, for members with at least 10 years but not more than 18.518 years of service. The maximum benefit in this case is 33 1/3% of Final Compensation.

Members who are eligible for a larger service retirement benefit may choose to receive that benefit in lieu of a disability benefit. Members eligible to retire, and who have attained the normal retirement age determined by their service retirement benefit formula, will receive the same dollar amount for disability retirement as that payable for service retirement. For members who have earned service with multiple CalPERS employers, the benefit attributed to each employer is the total disability allowance multiplied by the ratio of service with a particular employer to the total CalPERS service.

Post-Retirement Death Benefit

Lump Sum Payment

Upon the death of a retiree, a one-time lump sum payment of \$500 will be made to the retiree's designated survivor(s), or to the retiree's estate.

Form of Payment for Retirement Allowance

Generally, the retirement allowance is paid to the retiree in the form of an annuity for as long as he or she is alive. The retiree may choose to provide for a portion of his or her allowance to be paid to any designated beneficiary after the retiree's death. CalPERS provides for a variety of such benefit options, which the retiree pays for by taking a reduction in his or her retirement allowance. The larger the amount to be provided to the beneficiary is, and the younger the beneficiary is, the greater the reduction to the retiree's allowance.

Pre-Retirement Death Benefits

Basic Death Benefit

Eligibility

An employee's beneficiary (or estate) may receive the Basic Death benefit if the member dies while actively employed. A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. A member's survivor who is eligible for any other pre-retirement death benefit described below may choose to receive that death benefit instead of this Basic Death benefit.

Benefit

The Basic Death Benefit is a lump sum in the amount of the member's accumulated contributions, where interest is currently credited at 8.25% per year, plus a lump sum in the amount of one month's salary for each completed year of current service, up to a maximum of six months' salary. For purposes of this benefit, one month's salary is defined as the member's average monthly full-time rate of compensation during the 12 months preceding death.

1957 Survivor Benefit

Eligibility

An employee's *eligible survivor(s)* may receive the 1957 Survivor benefit if the member dies while actively employed, has attained at least age 50, and has at least 5 years of credited service (total service across all CalPERS employers and with certain other Retirement Systems with which CalPERS has reciprocity agreements). A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. An eligible survivor means the surviving spouse to whom the member was married at least one year before death or, if there is no eligible spouse, to the member's unmarried children under age 18. A member's survivor may choose this benefit in lieu of the Basic Death benefit or the Special Death benefit.

Benefit

The 1957 Survivor benefit is a monthly allowance equal to one-half of the unmodified Service Retirement benefit that the member would have been entitled to receive if the member had retired on the date of his or her death. If the benefit is payable to the spouse, the benefit is discontinued upon the death of the spouse. If the benefit is payable to a dependent child, the benefit will be discontinued upon death or attainment of age 18, unless the child is disabled. There is a guarantee that the total amount paid will at least equal the Basic Death benefit.

Cost-of-Living Adjustments

Beginning the second calendar year after the year of retirement, retirement and survivor allowances will be annually adjusted on a compound basis by 2%. However, the cumulative adjustment may not be greater than the cumulative change in the Consumer Price Index since the date of retirement.

Purchasing Power Protection Allowance (PPPA)

Retirement and survivor allowances are protected against inflation by PPPA. PPPA benefits are cost-of-living adjustments that are intended to maintain an individual's allowance at 80% of the initial allowance at retirement adjusted for inflation since retirement. The PPPA benefit will be coordinated with other cost-of-living adjustments provided under the plan.

Employee Contributions

Each employee contributes toward his or her retirement based upon the following schedule. The employer may choose to "pick-up" these contributions for the employees.

The percent contributed below the monthly compensation breakpoint is 0%.

The monthly compensation breakpoint is \$133.33.

The percent contributed above the monthly compensation breakpoint is 7%.

Refund of Employee Contributions

If the member's service with the employer ends, and if the member does not satisfy the eligibility conditions for any of the retirement benefits above, the member may elect to receive a refund of his or her employee contributions, which are credited annually with 6% interest.

SUMMARY OF BENEFITS: COVERAGE GROUP 70402

The following is a summary of the major plan provisions used in calculating the liabilities of the plan. Many of the statements in this summary are general in nature, and are intended to provide an easily understood summary of the complex Public Employees' Retirement Law. The law itself governs in all situations.

RETIREMENT PROGRAM

Service Retirement

Eligibility

A CalPERS member becomes eligible for Service Retirement upon attainment of age 50 with at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements)

Benefit

The Service Retirement benefit calculated for service earned by this group of employees is a monthly allowance equal to the product of the *benefit factor*, *years of service*, and *final compensation*, where

- The *benefit factor* for this group of employees comes from the **2% at 60** benefit factor table. The factor depends on the member's age at retirement. Listed below are the factors for retirement at whole year ages:

<u>Retirement Age</u>	<u>2% at 60 Factor</u>
50	1.092%
51	1.156%
52	1.224%
53	1.296%
54	1.376%
55	1.460%
56	1.552%
57	1.650%
58	1.758%
59	1.874%
60	2.000%
61	2.134%
62	2.272%
63 & Up	2.418%

- The *years of service* is the amount credited by CalPERS to a member while he or she is employed in this group (or for other periods that are recognized under the employer's contract with CalPERS). For a member who has earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance. Any unused sick leave accumulated at the time of retirement will be converted to credited service at the rate of 0.004 years of service for each day of sick leave.
- The *final compensation* is the monthly average of the member's highest 36 consecutive months' full-time equivalent monthly pay (no matter which CalPERS employer paid this

compensation). The employees in this group are not covered by Social Security. The final compensation is not offset by a dollar amount.

- The Service Retirement benefit is not capped.

Vested Deferred Retirement

Eligibility for Deferred Status

A CalPERS member becomes eligible for a deferred vested retirement benefit when he or she leaves employment, keeps his or her contribution account balance on deposit with CalPERS, **and** has earned at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements).

Eligibility to Start Receiving Benefits

The CalPERS member becomes eligible to receive the deferred retirement benefit upon satisfying the eligibility requirements for Deferred Status and upon attainment of age 50.

Benefit

The vested deferred retirement benefit is the same as the Service Retirement benefit, where the benefit factor is based on the member's age at allowance commencement. For members who have earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance.

Non-Industrial (Non-Job Related) Disability Retirement

Eligibility

A CalPERS member is eligible for Non-Industrial Disability Retirement if he or she becomes *disabled* and has at least 5 years of credited service (total service across all CalPERS employers, and with certain other Retirement Systems with which CalPERS has reciprocity agreements). There is no special age requirement. *Disabled* means the member is unable to perform his or her job because of an illness or injury which is expected to be permanent or to last indefinitely. The illness or injury does not have to be job related. A CalPERS member must be actively working with any CalPERS employer at the time of disability in order to be eligible for this benefit.

Benefit

The Non-Industrial Disability Retirement benefit is a monthly allowance equal to 1.8% of final compensation, multiplied by *service*, which is determined as follows:

- *service* is CalPERS credited service, for members with less than 10 years of service or greater than 18.518 years of service; or
- *service* is CalPERS credited service plus the additional number of years that the member would have worked until age 60, for members with at least 10 years but not more than 18.518 years of service. The maximum benefit in this case is 33 1/3% of Final Compensation.

Members who are eligible for a larger service retirement benefit may choose to receive that benefit in lieu of a disability benefit. Members eligible to retire, and who have attained the normal retirement age determined by their service retirement benefit formula, will receive the same dollar amount for disability retirement as that payable for service retirement. For members who have earned service with multiple CalPERS employers, the benefit attributed to each employer is the total disability allowance multiplied by the ratio of service with a particular employer to the total CalPERS service.

Post-Retirement Death Benefit

Lump Sum Payment

Upon the death of a retiree, a one-time lump sum payment of \$500 will be made to the retiree's designated survivor(s), or to the retiree's estate.

Form of Payment for Retirement Allowance

Generally, the retirement allowance is paid to the retiree in the form of an annuity for as long as he or she is alive. The retiree may choose to provide for a portion of his or her allowance to be paid to any designated beneficiary after the retiree's death. CalPERS provides for a variety of such benefit options, which the retiree pays for by taking a reduction in his or her retirement allowance. The larger the amount to be provided to the beneficiary is, and the younger the beneficiary is, the greater the reduction to the retiree's allowance.

Pre-Retirement Death Benefits

Basic Death Benefit

Eligibility

An employee's beneficiary (or estate) may receive the Basic Death benefit if the member dies while actively employed. A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. A member's survivor who is eligible for any other pre-retirement death benefit described below may choose to receive that death benefit instead of this Basic Death benefit.

Benefit

The Basic Death Benefit is a lump sum in the amount of the member's accumulated contributions, where interest is currently credited at 8.25% per year, plus a lump sum in the amount of one month's salary for each completed year of current service, up to a maximum of six months' salary. For purposes of this benefit, one month's salary is defined as the member's average monthly full-time rate of compensation during the 12 months preceding death.

1957 Survivor Benefit

Eligibility

An employee's *eligible survivor(s)* may receive the 1957 Survivor benefit if the member dies while actively employed, has attained at least age 50, and has at least 5 years of credited service (total service across all CalPERS employers and with certain other Retirement Systems with which CalPERS has reciprocity agreements). A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. An eligible survivor means the surviving spouse to whom the member was married at least one year before death or, if there is no eligible spouse, to the member's unmarried children under age 18. A member's survivor may choose this benefit in lieu of the Basic Death benefit or the Special Death benefit.

Benefit

The 1957 Survivor benefit is a monthly allowance equal to one-half of the unmodified Service Retirement benefit that the member would have been entitled to receive if the

member had retired on the date of his or her death. If the benefit is payable to the spouse, the benefit is discontinued upon the death of the spouse. If the benefit is payable to a dependent child, the benefit will be discontinued upon death or attainment of age 18, unless the child is disabled. There is a guarantee that the total amount paid will at least equal the Basic Death benefit.

Cost-of-Living Adjustments

Beginning the second calendar year after the year of retirement, retirement and survivor allowances will be annually adjusted on a compound basis by 2%. However, the cumulative adjustment may not be greater than the cumulative change in the Consumer Price Index since the date of retirement.

Purchasing Power Protection Allowance (PPPA)

Retirement and survivor allowances are protected against inflation by PPPA. PPPA benefits are cost-of-living adjustments that are intended to maintain an individual's allowance at 80% of the initial allowance at retirement adjusted for inflation since retirement. The PPPA benefit will be coordinated with other cost-of-living adjustments provided under the plan.

Employee Contributions

Each employee contributes toward his or her retirement based upon the following schedule. The employer may choose to "pick-up" these contributions for the employees.

The percent contributed below the monthly compensation breakpoint is 0%.

The monthly compensation breakpoint is \$0.

The percent contributed above the monthly compensation breakpoint is 7%.

Refund of Employee Contributions

If the member's service with the employer ends, and if the member does not satisfy the eligibility conditions for any of the retirement benefits above, the member may elect to receive a refund of his or her employee contributions, which are credited annually with 6% interest.

1959 Survivor Benefit Fourth Level

This benefit is not included in the results presented earlier in this valuation. Please see Appendix D for more information.

Appendix C

GASB STATEMENT NO. 27

**MISCELLANEOUS PLAN of the CITY OF STOCKTON
 Information for Compliance with GASB Statement No. 27**

Under GASB 27, an employer reports an annual pension cost (APC) equal to the annual required contribution (ARC) plus an adjustment for the cumulative difference between the APC and the employer's actual plan contributions for the year. The cumulative difference is called the net pension obligation (NPO). The ARC for the period July 1, 2003 to June 30, 2004 has been determined by an actuarial valuation of the plan as of June 30, 2001. The contribution rate for the indicated period is 3.689% of payroll for the Retirement Program. In order to calculate the dollar value of the ARC for inclusion in financial statements prepared as of June 30, 2004, this contribution rate, as modified by any amendments for the year, would be multiplied by the payroll of covered employees that was actually paid during the period July 1, 2003 to June 30, 2004. The employer and the employer's auditor are responsible for determining the NPO and the APC.

A summary of principal assumptions and methods used to determine the ARC is shown below.

	<u><i>Retirement Program</i></u>	<u><i>1959 Survivor Program</i></u>
Valuation Date	June 30, 2001	N/A
Actuarial Cost Method	Entry Age Actuarial Cost Method	N/A
Amortization Method	Level Percent of Payroll	N/A
Average Remaining Period	15 Years as of the Valuation Date	N/A
Asset Valuation Method	3 Year Smoothed Market	N/A
Actuarial Assumptions		
Investment Rate of Return	8.25% (net of administrative expenses)	N/A
Projected Salary Increases	3.75% to 14.20% depending on Age, Service, and type of employment	N/A
Inflation	3.50%	N/A
Payroll Growth	3.75%	N/A
Individual Salary Growth	A merit scale varying by duration of employment coupled with an assumed annual inflation growth of 3.50% and an annual production growth of 0.25%.	N/A

Initial unfunded liabilities are amortized over a closed period that depends on the plan's date of entry into CalPERS. Subsequent plan amendments are amortized as a level % of pay over a closed 20-year period. Gains and losses that occur in the operation of the plan are amortized over a rolling period, which results in an amortization of 10% of unamortized gains and losses each year. If the plan's accrued liability exceeds the actuarial value of plan assets, then the amortization payment on the total unfunded liability may not be lower than the payment calculated over a 30 year amortization period. More complete information on assumptions and methods is provided in Appendix A of this report. Appendix B contains a description of benefits included in the valuation.

The Schedule of Funding Progress below shows the recent history of the actuarial value of assets, actuarial accrued liability, their relationship, and the relationship of the unfunded actuarial accrued liability to payroll.

Retirement Program

Valuation Date	Accrued Liability (a)	Actuarial Value of Assets (b)	Unfunded Liability (Excess Assets) (a)-(b)	Funded Status (b)/(a)	Annual Covered Payroll (c)	UAAL As a % of Payroll [(a)-(b)]/(c)

Appendix D

1959 SURVIVOR BENEFIT PROGRAMS

SUPPLEMENTAL INFORMATION

(THIRD, FOURTH, AND INDEXED LEVELS)

Shown below is a summary of the funded status of the 1959 Survivor Benefit Programs (Third, Fourth and Indexed Levels). The figures were extracted from the June 30, 2001 1959 Survivor Benefit Actuarial Valuation Report to the CalPERS Board.

1959 Survivor Benefit Program (Third Level Pool)

1. Actuarial Accrued Liability as of June 30, 2001	\$	27,182,028
2. Actuarial Value of Assets as at June 30, 2001		<u>96,318,182</u>
3. Unfunded Liability / (Excess Assets) as of June 30, 2001[(1) – (2)]	\$	(69,136,154)
4. Funded Status		354.3%
5. Employer Normal Cost Per member per month, fiscal year 2002-2003	\$	0.60
6. Total Employer Cost per member per month, fiscal year 2002-2003*	\$	0.00

1959 Survivor Benefit Program (Fourth Level Pool)

1. Actuarial Accrued Liability as of June 30, 2001	\$	44,575,393
2. Actuarial Value of Assets as at June 30, 2001		<u>87,226,958</u>
3. Unfunded Liability / (Excess Assets) as of June 30, 2001 [(1) – (2)]	\$	(42,651,565)
4. Funded Status		195.7%
5. Employer Normal Cost Per member per month, fiscal year 2002-2003	\$	5.00
6. Total Employer Cost per member per month, fiscal year 2002-2003*	\$	0.00

1959 Survivor Benefit Program (Indexed Level Pool)

1. Actuarial Accrued Liability as of June 30, 2001	\$	3,273,649
2. Actuarial Value of Assets as at June 30, 2001		7,065,885
3. Unfunded Liability / (Excess Assets) as of June 30, 2001 [(1) – (2)]	\$	(3,792,236)
4. Funded Status		215.8%
5. Employer Normal Cost Per member per month, fiscal year 2002-2003	\$	3.90
6. Total Employer Cost per member per month, fiscal year 2002-2003*	\$	0.00

* Plans that join the pool within the past five years may have some additional cost

The following is a summary of the plan provisions used in calculating the liabilities. This summary is general in nature, and is intended to provide an easily understood summary of the complex Public Employees' Retirement Law. The Law itself governs in all situations.

THIRD LEVEL 1959 SURVIVOR BENEFITS PROGRAM

Eligibility

An employee's *eligible survivor(s)* may receive the 1959 Survivor benefit if the member dies while actively employed and the member had elected to pay for coverage under this benefit program. A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. An eligible survivor means the surviving spouse to whom the member was married at least one year before death and who is either caring for unmarried children under age 22 or is at least 62* years old; or, if there is no eligible spouse, the member's unmarried children under age 22. A member's survivor who is eligible for any other pre-retirement death benefit described in the **Retirement Program** section above will receive the 1959 Survivor benefit in addition to that death benefit, except as described in the paragraphs below.

Benefit

The benefit, for members who elected this coverage or for whom this coverage was mandatory, is a monthly allowance equal to one of the following, depending upon the set of eligible survivors:

\$840 to an eligible spouse with two or more eligible children; or three or more eligible children.

\$700 to an eligible spouse with one eligible child; or two eligible children only.

\$350 to one eligible child only; or spouse age 62* or older; or dependent parents.

If the benefit is payable to the spouse, the benefit is discontinued upon the death of the spouse. If the benefit is payable to a dependent child, the benefit will be discontinued upon death, marriage or attainment of age 22.

If a member's survivor is receiving the Special Death benefit as described in the **Retirement Program** section above, then the amount of the 1959 Survivor benefit will be reduced by the amount of the Special Death benefit.

* An agency may contract for the benefit to become payable to a surviving spouse at age 60.

Cost-of-Living Adjustment

There is no cost-of-living adjustment to the 1959 Survivor benefit.

Employee Contributions

Each employee contributes \$2.00 per month. These contributions are non-refundable.

Impact on Employer Contributions

The employer contributions for this level of the 1959 Survivor benefit are billed separately. The costs of this benefit are not considered in this valuation.

FOURTH LEVEL 1959 SURVIVOR BENEFITS PROGRAM

Eligibility

An employee's *eligible survivor(s)* may receive the 1959 Survivor benefit if the member dies while actively employed and the member had elected to pay for coverage under this benefit program. A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. An eligible survivor means the surviving spouse to whom the member was married at least one year before death and who is either caring for unmarried children under age 22 or is at least 60 years old; or, if there is no eligible spouse, the member's unmarried children under age 22. A member's survivor who is eligible for any other pre-retirement death benefit described in the **Retirement Program** section above will receive the 1959 Survivor benefit in addition to that death benefit, except as described in the paragraphs below.

Benefit

The benefit, for members who elected this coverage or for whom this coverage was mandatory, is a monthly allowance equal to one of the following, depending upon the set of eligible survivors:

\$2,280 to an eligible spouse with two or more eligible children; or three or more eligible children.

\$1,900 to an eligible spouse with one eligible child; or two eligible children only.

\$950 to one eligible child only; or spouse age 60 or older; or dependent parents.

If the benefit is payable to the spouse, the benefit is discontinued upon the death of the spouse. If the benefit is payable to a dependent child, the benefit will be discontinued upon death, marriage or attainment of age 22.

If a member's survivor is receiving the Special Death benefit as described in the **Retirement Program** section above, then the amount of the 1959 Survivor benefit will be reduced by the amount of the Special Death benefit.

Cost-of-Living Adjustment

There is no cost-of-living adjustment to the 1959 Survivor benefit.

Employee Contributions

Each employee contributes \$2.00 per month. These contributions are non-refundable.

Impact on Employer Contributions

The employer contributions for this level of the 1959 Survivor benefit are billed separately. The costs of this benefit are not considered in this valuation.

INDEXED LEVEL 1959 SURVIVOR BENEFITS PROGRAM

Eligibility

An employee's *eligible survivor(s)* may receive the 1959 Survivor benefit if the member dies while actively employed and the member had elected to pay for coverage under this benefit program. A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. An eligible survivor means the surviving spouse to whom the member was married at least one year before death and who is either caring for unmarried children under age 22 or is at least 60 years old; or, if there is no eligible spouse, the member's unmarried children under age 22. A member's survivor who is eligible for any other pre-retirement death benefit described in the **Retirement Program** section above will receive the 1959 Survivor benefit in addition to that death benefit, except as described in the paragraphs below.

Benefit

The benefit, for members who elected this coverage or for whom this coverage was mandatory, is a monthly allowance equal to one of the following, depending upon the set of eligible survivors:

\$1,500 to an eligible spouse with two or more eligible children; or three or more eligible children.

\$1,000 to an eligible spouse with one eligible child; or two eligible children only.

\$500 to one eligible child only; or spouse age 60 or older; or dependent parents.

If the benefit is payable to the spouse, the benefit is discontinued upon the death of the spouse. If the benefit is payable to a dependent child, the benefit will be discontinued upon death, marriage or attainment of age 22.

If a member's survivor is receiving the Special Death benefit as described in the **Retirement Program** section above, then the amount of the 1959 Survivor benefit will be reduced by the amount of the Special Death benefit.

Cost-of-Living Adjustment

The benefits stated above were effective January 1, 2000. In each subsequent year following the effective date, the benefits are indexed at a rate of 2 percent per year for both beneficiaries already receiving the benefit and for potential beneficiaries of members who die in the future. As of June 30, 2001, the respective benefits are \$1,530, \$1,020, and \$510.

Employee Contributions

Each employee contributes \$2.00 per month, until such time as the total annual cost exceeds \$4.00 per member, per month. After that point, the employee will pay for half of the total cost (but never less than \$2.00). These contributions are non-refundable.

Impact on Employer Contributions

The employer contributions for this level of the 1959 Survivor benefit are billed separately. The costs of this benefit are not considered in this valuation.

Appendix E

GLOSSARY

Glossary of Actuarial Terms

Present Value of Benefits

The total dollars needed as of the valuation date to fund all *past* and *future* benefits for *current* members of the plan.

Accrued Liability

The desired total dollars needed as of the valuation date to fund all *past* benefits for *current* members of the plan.

Normal Cost

The annual cost of providing benefits for the upcoming fiscal year. It should be viewed as the long term employer contribution rate.

Actuarial Value of Assets

The actuarial value of assets used for funding purposes is obtained through an asset smoothing technique where investment gains & losses are not fully recognized in the year they are incurred.

This method helps to avoid large fluctuations in employer contribution rate.

Unfunded Accrued Liability / (Excess Assets)

A plan with an actuarial value of assets below the accrued liability is said to have an unfunded accrued liability and must temporarily increase contributions to get back on schedule.

A plan with an actuarial value of assets in excess of the accrued liability is said to have excess assets (or being overfunded) and can temporarily reduce future contributions.
